Behind all our clothes and products lies a very clear concept. That they should make your working day easier, more comfortable and more functional, and we believe that good design and smart functions always go hand in hand. In this workbook we’ve collected all our new items from this year. Here are a few of our favourites.

You have one tool which is more important than every other tool in the toolbox. One which is more fragile, more valuable and more dynamic, and which can outperform all the other tools put together. Your body.

We believe that it’s easier to do a good job and stretch your limits if nothing is pulling or chafing, and if you can move freely and without hindrance.

That’s why we’ve developed WorkMove™ in three different ranges, and why we want to help you become more mobile – and stretch your limits.

Let nothing stand in your way. Not yourself, not your ideas of what you think is possible and, least of all, not your trousers.

STRETCH YOUR LIMITS.
Different professions and work scenarios require different trousers. That’s why we’ve divided our stretch work trousers into three ranges: Max, Medium and Light. They’re all designed to follow the body’s natural movements, and to suit different types of work and work environment.

To achieve this, we work with the best materials on the market, Cordura stretch, Kevlar stretch and Dyneema. All to give you as a user extreme comfort, movability and durability.

No matter which range of stretch trousers you choose, you can be sure they’ll make you feel more comfortable at work.

On the following two spreads we’ll guide you to the right trousers for your working day.
Maximised stretch zones with extreme durability and flexibility characterise our WorkMove™ Max trousers. 4-way stretch Cordura front and rear, in the crotch and on the calves provides maximum movability. Knee-pad pockets with 4-way stretch Kevlar for extra durability.

What’s more, we have our new full stretch trouser 1050PB with knee-pad pockets in Dyneema material.

Stretch trousers in the WorkMove™ Medium range feature generous stretch panels on the front and knees for great comfort while working. Front in 4-way stretch Cordura and knees in 4-way stretch Kevlar.
The WorkMove™ Light range features stretch trousers in airy, light and slightly thinner fabric than the Max and Medium ranges. Generous number of stretch zones in 4-way stretch Cordura. Suitable for those who work in, for example, service, logistics, industry and warehousing, or who have particularly high demands on movability and comfort.

1050PB

PROPERTIES AND USER BENEFITS
- Full stretch trousers in 4-way stretch Cordura for extremely good movability, comfort and ventilation.
- Adjustable waistband in non-stretch material for the best fit.
- Nail pockets, leg pockets and rule pocket in non-stretch material.
- Stretch material and a narrow cut for a trouser with a closer fit and optimum comfort.
- Pre-shaped knees for a better fit and flexibility.
- Reinforced knee- pad pockets in Dyneema (4-way stretch).
- Nail pockets with zipped compartment for screw bits, for example.
- Zipped leg pocket for improved safety.
- Angled mobile phone pocket with magnetic clasp to keep your phone in place.
- Extendible by 5 cm.

MATERIAL AND WEIGHT:
88% polyamide, 12% elastane, 275 g/m²

SIZE
44-60, D84-D104

The king of trousers.

1050PB is made completely from stretch material and could be described as the king of trousers. Here we combine maximum movability with extreme durability. The trousers are light and flexible, developed in close collaboration with our users – and based on high standards of comfort and quality.
PROPERTIES AND USER BENEFITS

• Stretch material over the seat, front and crotch, as well as the front and rear sections of the knee for extremely good movability, comfort and ventilation.
• The use of stretch material and a narrower fit gives a more body-hugging trouser with knee-pads that stay put.
• Reinforced knee-pad pockets in stretch Kevlar provide both good movability and durability.
• Pre-shaped knees for a better fit and flexibility.
• Reinforced hanging pockets with increased volume.
• Ventilation on the inside thigh which is controlled with the aid of a zip, internally lined with mesh fabric to keep the user cool.
• On the left leg pocket there is a correctly angled phone pocket with a magnetic lock to keep the phone protected and in place.
• A strong half-Panama weave in polyester/cotton to give the best durability.
• Extendible by 5 cm.

MATERIAL AND WEIGHT:
65% polyester, 35% cotton. 325 g/m².

SIZE
44-60, D84-D120

1052PB

Premium trouser model.

The fact that 1052PB is our absolute pride and joy when it comes to trousers cannot be emphasised enough. Each detail has been thoroughly made - each function, each seam. Everything in the right place and made with the right quality. Produced and developed in close collaboration with people who work in them every day.

Try for yourself - we’re sure you’ll like them.
PROPERTIES AND USER BENEFITS

A trouser to feel good in.

Using 1052PB as a prototype, this trouser has been developed in a somewhat simpler design, but without compromising quality or fit. The stretch material has been used somewhat more sparingly and the rear pockets are of a traditional, exterior model.
PROPERTIES AND USER BENEFITS

- A strong half-panama weave in cotton/polyester to give the best durability.
- Stretch fabric at the front, across the knees, the backs of the knees and over the entirety of the calf for good mobility, comfort and airflow.
- Using stretch material and a narrower fit gives a more body-hugging trouser with knee-pads that stay put.
- Pre-shaped knees for a better fit and flexibility.
- Reinforced knee-pad pockets in stretch Kevlar provide both good movability and durability.

MATERIAL AND WEIGHT:
65% polyester, 35% cotton. 325 g/m².

SIZE
34-48

A series in 0502-Y.

Tradition and practicality dictate that painters and brickworkers wear white. However, not so much has been said about fit and flexibility, which is a little strange considering both professions need room for movement.

Our series of painter trousers - full-length, three-quarter-length and shorts in the same model - therefore feature generous stretch panels and a thin main material, making them light, cool and flexible.
PROPERTIES AND USER BENEFITS
• Water and dirt-repellent.
• The weave structure ensures a strong garment.
• Stretch material in the front and rear sections of the knee for extremely good movability, comfort and ventilation.
• Using stretch material and a narrower fit gives a more body-hugging trousers with knee-pads that stay put.
• Pre-shaped knees for a better fit and flexibility.
• Reinforced knee-pad pockets in stretch Kevlar provide both good movability and durability.
• Extendible by 5 cm.
• Pre-shaped knees for a better fit and flexibility.
• Reinforced knee-pad pockets in stretch Kevlar provide both good movability and durability.
• Matches the structure and colour of jackets 425PB, 203PB and 225PR.
• Pre-formed panels are pliable, and give a degree of stretch with good breathability as well as greater durability as they stand up better against wear and tear in the wash.

MATERIAL AND WEIGHT:
80% polyester, 20% cotton. 310 g/m².

1842PB

Functional trousers for working in.

A thin, lightweight and versatile trouser for those working in the service sector and for those moving around a lot in their work. If you’re looking for a pair of really comfortable and functional trousers – with the right pockets in the right places – this is the perfect stretch trouser. With its high quality and really good fit you will be able to use 1842PB both frequently and extensively.

PROPERTIES AND USER BENEFITS

• Stretch material over the seat, front and crotch, as well as in the front and rear sections of the knee for extremely good movability, comfort and ventilation.
• Using stretch material and a narrower fit gives a more body-hugging trouser.
• Pre-shaped knees for a better fit and flexibility.
• Extendible by 5 cm.

DON’T SCRATCH THE PAINT.

Things move fast at Börjessons Bil in Alingsås. Cars are serviced, engine parts are replaced and wheels are balanced. The premises are bright, clean and airy, and as of six months ago everyone who works on the cars wears work trousers from L.Brador’s No-Scratch range.

Gunnar Burman moves comfortably around one of the cars, busy repairing the rear lights. "Switching to stretch trousers without visible metal detailing means that you no longer have to worry about scratching painted surfaces. Now we can move around more freely, and there’s no risk when leaning on or moving against the car," says Gunnar.

Read the full story from Börjessons Bil at lbrador.com

WORKING BEHIND THE SCENES.

The NO-SCRATCH range gathers all our trousers with concealed metal detailing. And just as the name implies, they have absolutely no detailing which can scratch or scrape sensitive and delicate surfaces, such as cars, technical equipment and freshly painted kitchen cabinets. They’re certainly useful in many different areas, and from our website you can download a catalogue full of tips and products for scenarios where you want to avoid scratching things.
You’ve not missed that the legs of all our trousers can be extended by a full 5 centimetres at the hem? That’s right, so that our trousers fit everyone they have an adjustable leg length, and all you need to do to lengthen them is to unpick the seam and turn down the hem.

To help ensure you get a neat result, we offer this invaluable tool:

If you can’t be seen, you’re not there. We probably don’t want to go that far, but on the other hand we know that you can only be seen if you make yourself visible. Basically it is about being clearly visible in environments where there are a lot of risks.

We develop our Hi-Vis garments using the same detailing and feel for quality as our other garments. We want them to be just as comfortable and attractive to wear as our workwear without reflective panels. And as functional, of course. An example is our Hi-Vis garments that have stretch material reflective details from 3M – probably the best reflective material in the world. As you can understand, we never skimp on quality. With L.Brador you can be assured of garments that last for a long time and reflective details that you can trust to make you visible.

Prepared for the weather.

One day rain, the next cold and windy. Changes in the weather demand flexible products which are easy to adapt with different layers. As an outer layer, 906P Hi-Vis is an incredibly good companion. It can withstand the Scandinavian climate, offers a perfect fit and gets the job done.

906P HI-VIS

PROPERTIES AND USER BENEFITS
• Wind and waterproof with good breathability properties and taped seams.
• A three-layer fabric, with the outer shell, membrane and lining laminated together.
• Close fit.
• Extended back to keep the hollow of the back warm.
• Easy access to the trousers' front pockets.
• Front placket which provides good protection against wind and reduces wear on the zip.
• The jacket has an adjustable hood, as well as an adjustable hem and cuffs.

Faster and more versatile throughout the working day.

These trousers have been produced for those who frequently move around really quickly at work, often at around a hundred kilometers per hour. With truck and excavator drivers and other machine operators in mind, visibility is kept in focus. The trousers are made of a thin, cool, lightweight and flexible material suited for work in service sectors and for those of you who drive for a living.

Be seen, be safe.

With the aim of improving the working environment for today’s professional drivers, these trousers were developed in close concert with the industry. A journey which resulted in, among other things, a strong half-Panama weave in polyester/cotton, 7 millimetres of cushioning on the knees and adjustable ventilation on the inner thigh for truly great comfort. What’s more, the reinforced knee-pad pockets in stretch Kevlar provide both good movability and extreme durability.
**160PB**

**Properties and User Benefits**
- Water and dirt-repellent.
- Strong garment due to weave structure.

- Water and dirt-repellent.
- Fold at the back for increased movement.
- Matches trousers 440PB, 188PB, 117PB, 185PB, 129PB and 160PB.
- The reflective material is pliable, with an amount of stretch and has good breathability and longer service life as it better resists wear and tear in the wash.
- ID-card pockets.

**Material and Weight**
- 80% polyester, 20% cotton. 3M-reflective material. 310 g/m².

**Certified in Compliance with**
- EN 471, class 3 and updated to EN ISO 20471, class 3.

**Size**
- XS-4XL
PROPERTIES AND USER BENEFITS
• Polyurethane-coated polyester jersey material for a dry feel.
• Lightweight, versatile stretch material for a high level of comfort.
• Watertight with sewn and welded seams.
• Length 90 cm (size L).
• ID-card pocket under the right pocket flap.

MATERIAL AND WEIGHT
55% polyester, 45% PU. 3M-reflective material. 170 g/m².

CERTIFIED IN COMPLIANCE WITH
EN 20471, class 3 and EN 343, class 3.

SIZE
XS-3XL.
A reflective waistcoat is a reflective waistcoat. Or is it?

It certainly is a reflective waistcoat. A waistcoat that reflects light. But in this case, we have added a couple of details that make your work both safer and simpler - an ID card pocket, a pocket for a walkie-talkie and a handset loop.

**4142P**

**PROPERTIES AND USER BENEFITS**
- Zip at the front.
- Reflective material on the shoulders for increased visibility from above.
- Chest pocket, ID card pocket and holder for walkie-talkie.

**CERTIFIED IN COMPLIANCE WITH:**
EN ISO 20471, Class 2.

We’ve developed a range of socks for work and movement, and they follow the same clever divisions as our underwear range. For the layer closest to the body—and the feet—the two most important factors to take into account are the wicking and warmth they offer.

So we’ve divided our socks into four different levels: Active, Active+, Warm and Warm+, and just as the names suggest, they run along the scale from good wicking and cooler to less wicking and really warm. Which one is best suited to you is determined by your own body temperature, how much you move about and the season.

Our socks are all of the highest quality, and they’re also reinforced at the toe and heel to minimise wear from your work shoes. On the next spread we take a closer look at their individual properties.
Active keeps your feet cool thanks to its very high wicking ability. This model is especially suitable if you generally have warm feet, move about a lot or mostly work indoors. The sock effectively wicks away moisture to avoid frozen feet which feel cold and stiff.

MODELS IN THIS LINE 757U | 746C

**ACTIVE**
Optimal moisture transport to keep body cool and dry for highly active work.

Active+ is suitable not only when you’re active, but also if you’re prone to feel cold or when the temperature is lower. Maybe you work both indoors and out and want to be able to go in and out from time to time without your feet feeling the cold. Active+ still offers a consistently high degree of wicking, and ensures a cool feeling throughout the working day.

MODELS IN THIS LINE 754UB | 750U

**ACTIVE+**
Optimal moisture transport with temperature management for highly active work in cooler temperatures.

WARM
Temperature management with good moisture transport for cooler temperatures.

Warm is a sock you can trust when the temperature drops, or if you work outdoors a lot during the winter season. And if you’re someone who generally feels the cold, of course. Thanks to the high-quality material and a favourable wool blend, it offers good wicking, comfort and warmth.

MODELS IN THIS LINE 741U | 742U

**WARM**

Warm+ keeps your feet warm on the very coldest days of the year. It’s particularly suitable for outdoor work when the temperature has fallen a bit below zero, or if you have to stand still for long periods or work in really cold environments. Wool has many great properties, and besides naturally efficient wicking it keeps you warm in a really comfortable way.

MODELS IN THIS LINE 760UA

**WARM+**
High temperature management with moisture transport for very cold temperatures.
### 746C

**Properties and User Benefits**
- CoolMax for the best wicking.
- Thin quality for use as an inner sock or on its own on summer days.
- Elastic channels and extra air channels for the best comfort and fit.

**MATERIAL AND WEIGHT:**
- 50% wool, 30% acrylic, 10% polyamide, 2% elastane

**SIZE**
- 36/39 - 44/47
PROPERTIES AND USER BENEFITS

• Made of wool for a warm and insulating effect.
• Reinforced with polyamide for extra durability.
• Woolen towelling on the inside for extra comfort.
• Knitted elastic zones for the best fit.
• Long leg for extra warmth.

MATERIAL AND WEIGHT:
60% wool, 20% acrylic, 17% polyamide, 3% elastane

SIZE
36/39-44/47

The right feeling with every step.

That this woollen sock is included in the Warm+ category has an obvious explanation. It’s really warm and comfortable, and keeps your feet warm even when the temperature drops sharply. At the same time, it also has the advantage of wicking away moisture, keeping your feet dry throughout the working day.
### 758B

**PROPERTIES AND USER BENEFITS**
- A good, all-round sock for all kinds of activities.
- V-knitted heel and towelling sole for the best comfort.
- Rib-knitted leg, 2-pack.

**MATERIAL AND WEIGHT:**

ART. NO. 2004P

PROPERTIES AND USER BENEFITS
• Adapted to working practices in the Nordic region and Northern Europe.
• Holder for screwdriver and other tools. Simplifies working on, e.g. a ladder. The screwdriver hangs facing backwards to minimise the risk of injuries.
• The belt is upholstered and is held in place by a strong metal clasp. This allows for both quick locking and adjustments.
• Heavy-duty fabric pockets designed for both screws and nails. These are designed to provide easy access to the materials contained within.
• Holder for a knife on both the right and left sides, as well as for laser or chalk reel.
• The tool pocket is designed to make the hammer easy to grip and put back.
• Of course, the belt has pockets for a ruler, angle iron or chisel, as well as the classic pen pocket.

SIZE
One-size
